

VERBATIM – PGCME-2020

| |
|---|
| Very good lectures. Excellent presentations ! |
| The video on coulter lab clarity could be improved. |
| I miss more than 10 slide marrow failure, poor signal. Thank u sir |
| Concepts explained clearly very good |
| Discussion with clinical scenarios could be useful |
| Good explanation of concepts |
| Enjoyed the session looking forward for afternoon |
| Good presentation. if possible please provide with recorded version for a day. due to covid duties some portion was not seen. |
| That sickle trait vs HbE vs that minor topic could have been more enlightened |
| The video section audio was not clear. some technical difficulties during the 4 th topic and was a broken presentation. A bit fast presentations. |
| Please someone check the slides while presentation is going on. sometimes speaker's presentation not correlating with the ppt |
| Very good and useful for examination |
| Recorded video sessions were unclear and not clearly audible some sessions were way too fast video breaks otherwise sessions were very good and useful |
| Overall very good presentation thank you |
| Queries needs to be answered live rather than sending answers personally |
| Presentation keep on breaking... please give clarity of bloods cell histogram basics, missed many things due to poor presentation clarity |
| Relevant topics discussed |
| Haemocytomorphometry explanations were very hurried and too many new concepts were introduced in a very short time. Lab demonstration had a lot of background noise. Other presentations were very apt and extremely useful from a family medicine perspective. |
| Kindly make these videos available on YouTube or CMC e learning for further reference as certain topics need repeated watching |
| Very poor audio clarity and video quality especially the Coulter lab demo and subsequent presentation. the speaker was excellent but the slides were stuck and it was very difficult to follow the slides of subsequent presentation was blurred and not clear |
| Voice recording was slightly low for the video on Coulter Lab. |
| Respected sir..it would be helpful if we were given handouts of these session.. |
| The video was getting blurred while viewing in laptop Other than the small technical issues very well conducted superb virtual CME Hats off to the team |
| It was a compact fast session with lot of data. Helpful. |
| At places there were some technical glitches, like in the second session by Dr Sukesh Nair, we could not access some starting case scenarios, I think it was mute .. few places we faced network problems from our side, so if recordings are made available to us, it will be very helpful . |
| The audio during lab demo (coulter) could have been better, probably via a microphone. The first talk could have been in more detail-as it is the core topic. |
| Hemomorphocytometry session got interrupted. plz upload vid in app |
| It could be of much use for pg's like us if these talks are made available for viewing at a later date |
| Thank you for an inspiring day |
| Overall very nice experience in Haematology today. Thank u CMC Vellore. Kindly improve slide quality if possible sir. |
| Overall types good and easily understand |
| Case based discussion on flow cytometry would have been very useful. |
| Please provide sometime for break without any videos |
| Wonderful talk by the last speaker. Was inspirational indeed. |
| Supply of education materials can be useful...as following numbers and noting it down fast is quite difficult |

VERBATIM – PGCME-2020

| |
|---|
| Sir kindly provide us with handouts |
| Thanks for the memorable sessions. |
| Great presentation but frequent breaks will help to focus better. |
| Enjoyed the presentation,gained knowledge and looking forward for tomorrow |
| Excellent commitment and organization. Thank you. |
| Very good experience sir. Thank u so much |
| Very informative and clinically helpful session Ÿsincere efforts from all faculties. Motivational and thought provoking session from Agarwal sir |
| Very good presentation especially Dr M B Agrawal sir's motivation is best of all thank you very much. |
| All the sessions are very informative but due to network issue the ppt were not that clear ... wish we can get the PPT's by any chance. thank you so much |
| Approaches to primary Immunodeficiencies, Thrombocytopenias and other topics were informative. Infection related Thrombocytopenias and their mechanisms could have made the cut. Who Am I was brilliant and stimulative. Thanks CMC for organizing this conference. |
| Speakers could be bit slow while explaining the concepts.it was bit hard to follow at some places. Thank you for the wonderful sessions |
| Please provide backup videos. |
| Well prepared topics, very helpful for us exam going.. Very encouraging and mind invigorating Sessions. The last session was totally unexpected but a great Booster. To become something, to give something special. thank you. |
| The presentation on WHO AM I !.. was inspiring |
| It benefited me a lot sir loved the presentation a lot |
| "Who am I" was very interesting, informative and excellent presentation. |
| Very jam packed session.. needed somewhat spreading out of sessions |
| Lot of difficulties in streaming. But was a wonderful session to attend overall.. Special mention that topic on diagnosis of Acute Leukemia was wonderful. |
| Thanks for all the Hematologists for working hard for presenting us a beautiful, excellent crystal clear presentation |
| The CME is a must for postgraduate of Medicine and Pathology. An academic feast indeed for 2 day. The virtual platform was a different but a good experience. Kudos to the entire team for making the CME possible. |
| Very nice presentation very helpful for us sir thanks for the initiative |
| Sir atleast 5minutes break each topic |
| Sheer hard work could be seen in getting together the whole came.. Thank u. |
| Thank you for the wonderful CME. Will help us a lot in practice and future. |
| Transplantation video tour and explanation were excellent. Opportunity for PG's to have a look at those. |
| This was very useful..it was well organised. Unable to follow the slides at times.. otherwise most memorable CME. |
| Some of the classes were too fast to catch up with. Since most of us are naive to the hematology terminologies it would have been better if topics very taken bit slower in some of the sessions. |
| On the whole it is so informative, refreshing and quick review of haematology. It will be more useful if you send the hard and soft copy of the above CME program. |
| No topic regarding covid was covered... |
| Great CME. Maybe extend over 3 days with frequent breaks and shorter programme time. |
| Kindly provide answers for pre test and quiz, without accommodation or lunch amount paid Rs.3500 is much higher I think, overall this CME enhanced my knowledge, Thank u. |
| The virtual platform is a tricky one with glitches here and then, but you people did a great job. When on the online platform spanning it over 3 - 4 days would be better. unable to concentrate after a few hours on the screen |
| The CME was a very well conducted event. The topics were very relevant and explained with the clinical and |

VERBATIM – PGCME-2020

| |
|--|
| other modern relevant materials. Congratulations to the Haematology team at CMC for conducting such a fabulous event. |
| SCT class was excellent |
| Day 2 did not disappoint at all. Apart from technical glitches, everything was well organized and kept simple. Thumbs up for the organizers for making this attempt. |
| Thank you for the conference everyone ! Kudos !!! |
| There was very less coverage of Transfusion Medicine. Most of the Transfusion Faculty was taking the lectures of the diagnosis of the diseases only. Overall it was a wonderful experience. Thank You CMC Vellore and Dr. Vikram Matthews for the amazing efforts. Hoe this pandemic ends soon and we will be able to attend real conferences. |
| Thanks entire CMC team for your efforts and having this CME. |
| Overall great efforts from the Team, one of the best CMEs. |
| Excellent CME for postgraduate |
| Wonderful presentation and clear speech by the speakers. Good CME overall. Useful |
| Breaks could be more . Too long |
| Pls Give adequate for topics like rationale for transfusion. Nice presentation but rushed up |
| Useful sessions. A few were little fast though. |
| Kindly post the videos in social platforms for everyone to learn. |
| Very good CME but plz reduce the prize of registration as its CoVid times.. Other CMEs were not that expensive like KLE n KAPCON.. Even Haematocon is free.. The educational material provided is excellent n that way you stand out from other CMEs.. And as a Senior Resident, I had a night duty n missed some lectures on day 2.. Wished that you provided recordings of these lectures on your website so that I can see them again |
| Overall it was a good experience .Thank you for providing good knowledge of hematology in 2 days, will sure helpful in practice. |
| Great effort by the staff in CMC. Have learnt a lot! |
| Very useful, informative and highly knowledgeable. |
| Very impressive and enjoyable presentations, wizardry speakers.. Excellent!!!! |
| kindly stress more on updates in Heamatology |
| We missed the actual CME as it was more interactive.. Overall virtual experience was good. |
| To give refresher course before exams for transfusion medicine PGs as done in dept of radio diagnosis, cmc, vellore |
| It was delightful that enlighten up our knowledge. THANK YOU. |
| Overall it was a great experience. Thank you. |
| Thank you so much for the wonderful program and knowledge given to me |
| Can be made better and interesting with actual case discussions |
| Face to face is good I think .. |
| Kudos to CMC for organizing an excellent webinar on Haematology. It helped me brush up my basic concepts. It also dealt with updated concepts in molecular genetics, measurable residual disease and related topics. Enjoyed it as a whole package and looking forward for the next year session. |
